Registry for Out-of-State Licensees to Practice in Kentucky During the Covid-19 State of Emergency

On August 18, 2021, The Cabinet for Health and Family Services (CHFS) issued a directive that the Kentucky Board of Respiratory Care review licenses submitted by health practitioners licensed in states other than Kentucky, and accept licenses found to be valid as authorized to practice respiratory care in the Commonwealth of Kentucky for the duration of the emergency. The authorization of valid respiratory care practitioners will be done through the Volunteer Health Practitioner application process. Please read the instructions, complete the application and submit to the email or fax number listed on the application.

This is a primary source verification of respiratory therapists licensed in the Commonwealth of Kentucky. This is for verification only. Any disciplinary information must be requested by contacting the KBRC. Newly licensed therapists may take several days to be listed and may be verified by the KBRC by fax or email if needed.

Kentucky Professionals Recovery Network

Kentucky Professionals Recovery Network (KYPRN) helps Kentucky Respiratory Therapists struggling with substance use by providing referrals for assessment and treatment, and by providing monitoring for substance use through daily check-ins, testing, and monthly reporting. KYPRN acts as a liaison between the licensee, with a path to long-term recovery, and the board with assurance that the

licensee is safe to continue to practice. KYPRN has the ability to assist those struggling with substance use anonymously (without the Board's knowledge). KYPRN can also assist those who are referred by the Board.
